

# AWS Life Science Hackathon

10/1 – 10/3

# BioGraphRAG

## Team 9:

Aymen Maqsood Mulbagal

Ben Stear

JP Courneya

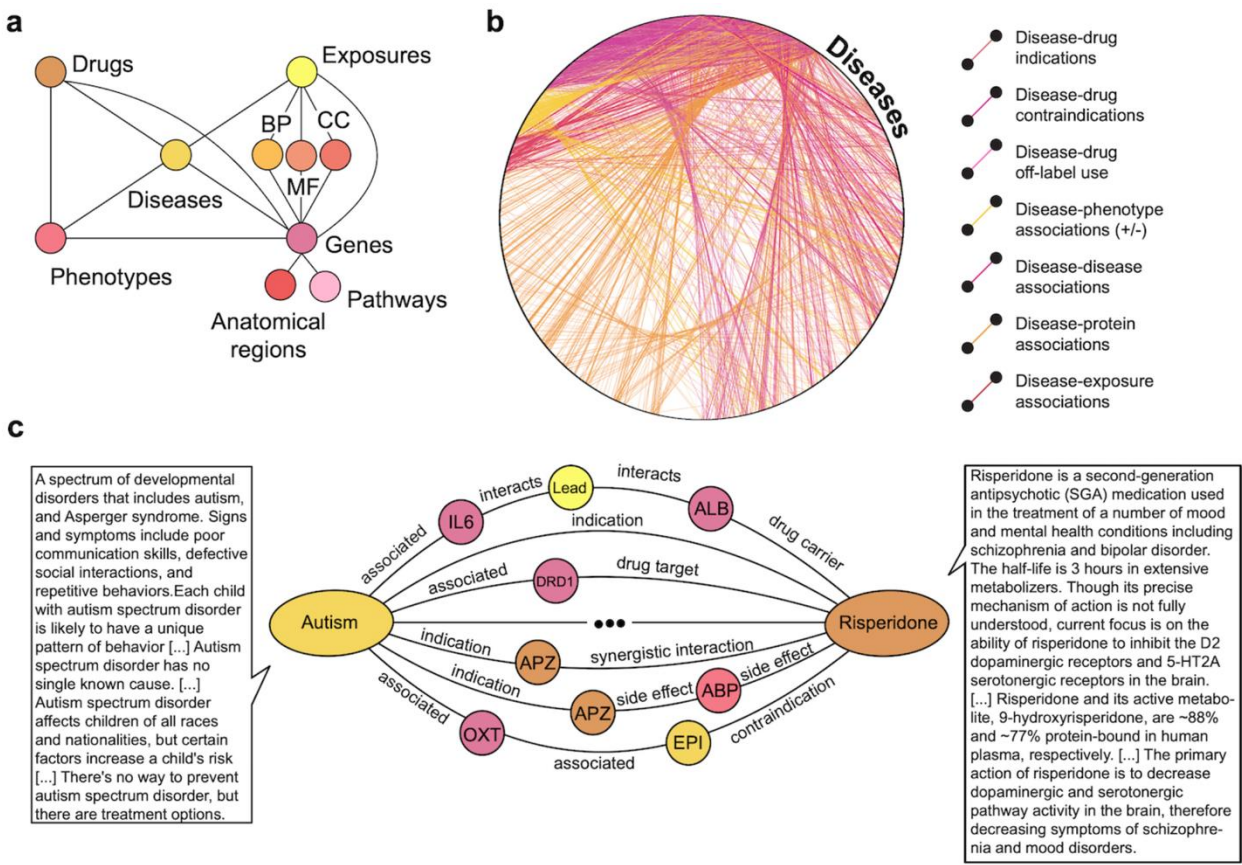

Mina P. Peyton

Victor Felix

Arun Bondali

Michelle Holko

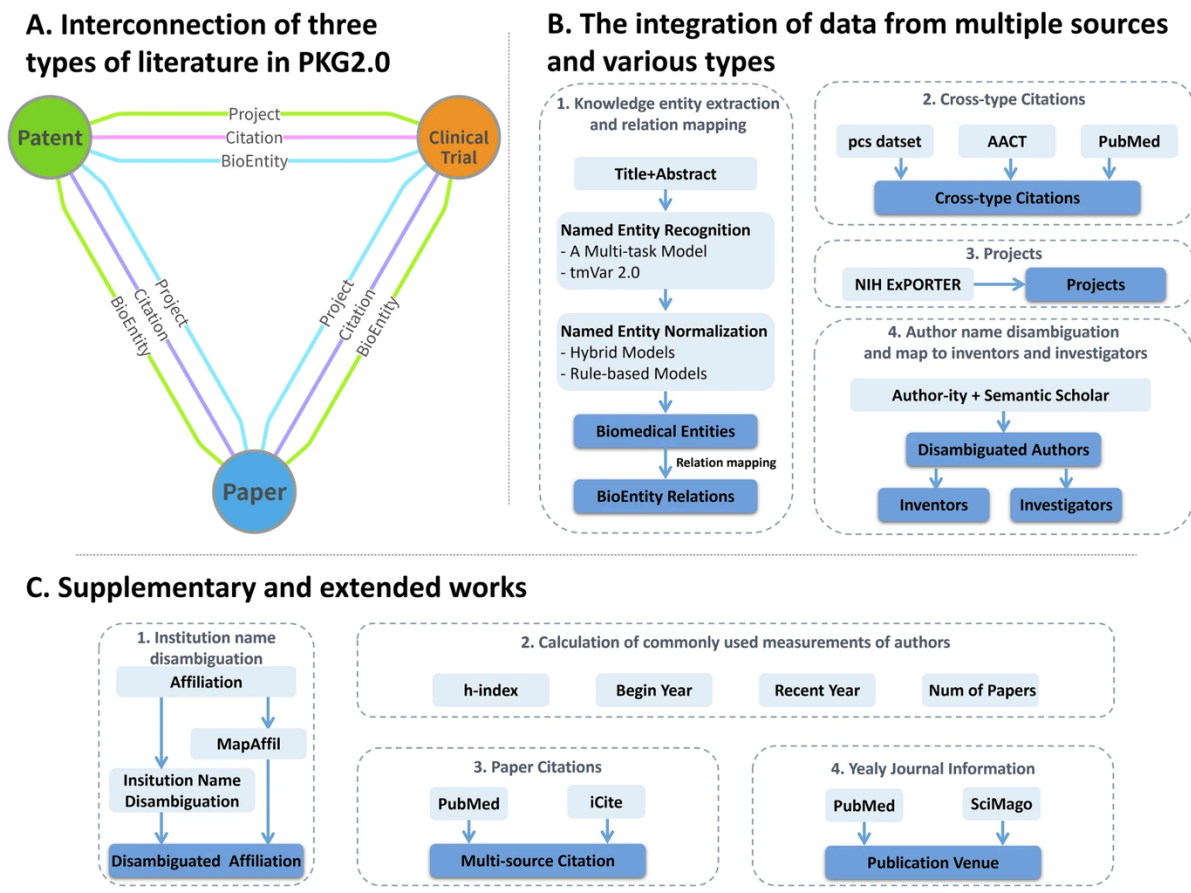

# Precision Medicine Knowledge Graph (PrimeKG)

## PrimeKG:

- integrates 20 resources:
  - 17,080 diseases with 4,050,249 relationships representing ten major biological scales

# Pubmed Knowledge Graph (PubKG)

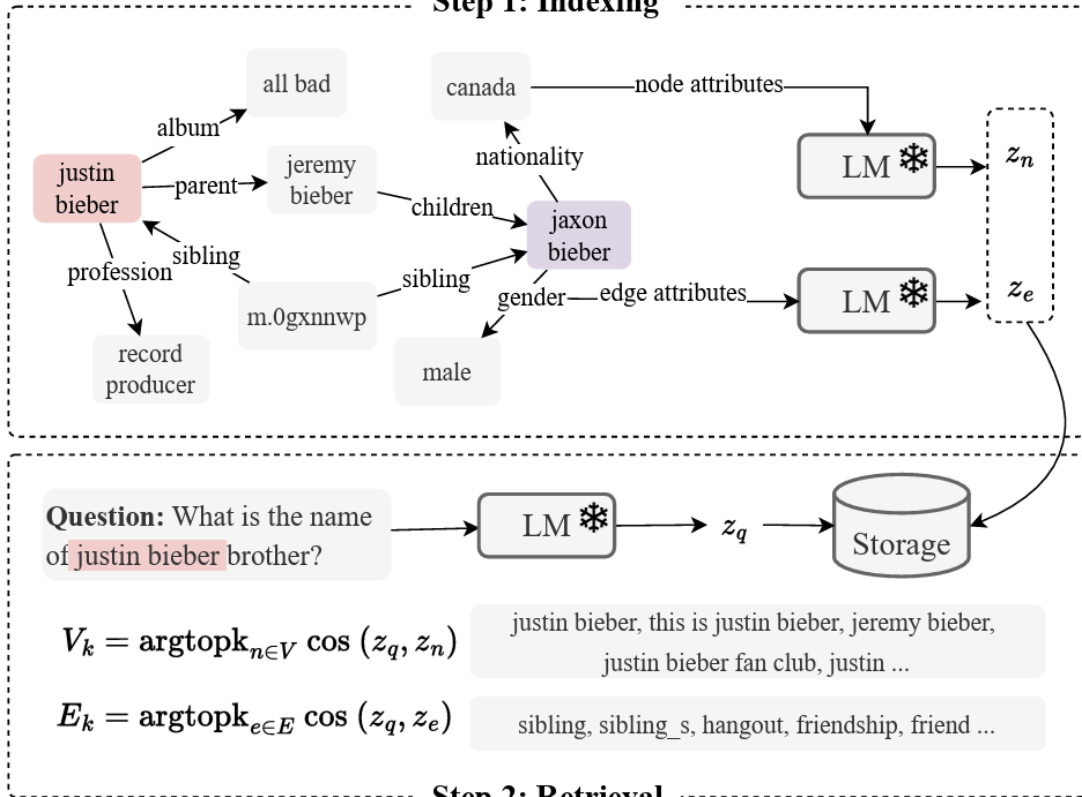

## PubKG:

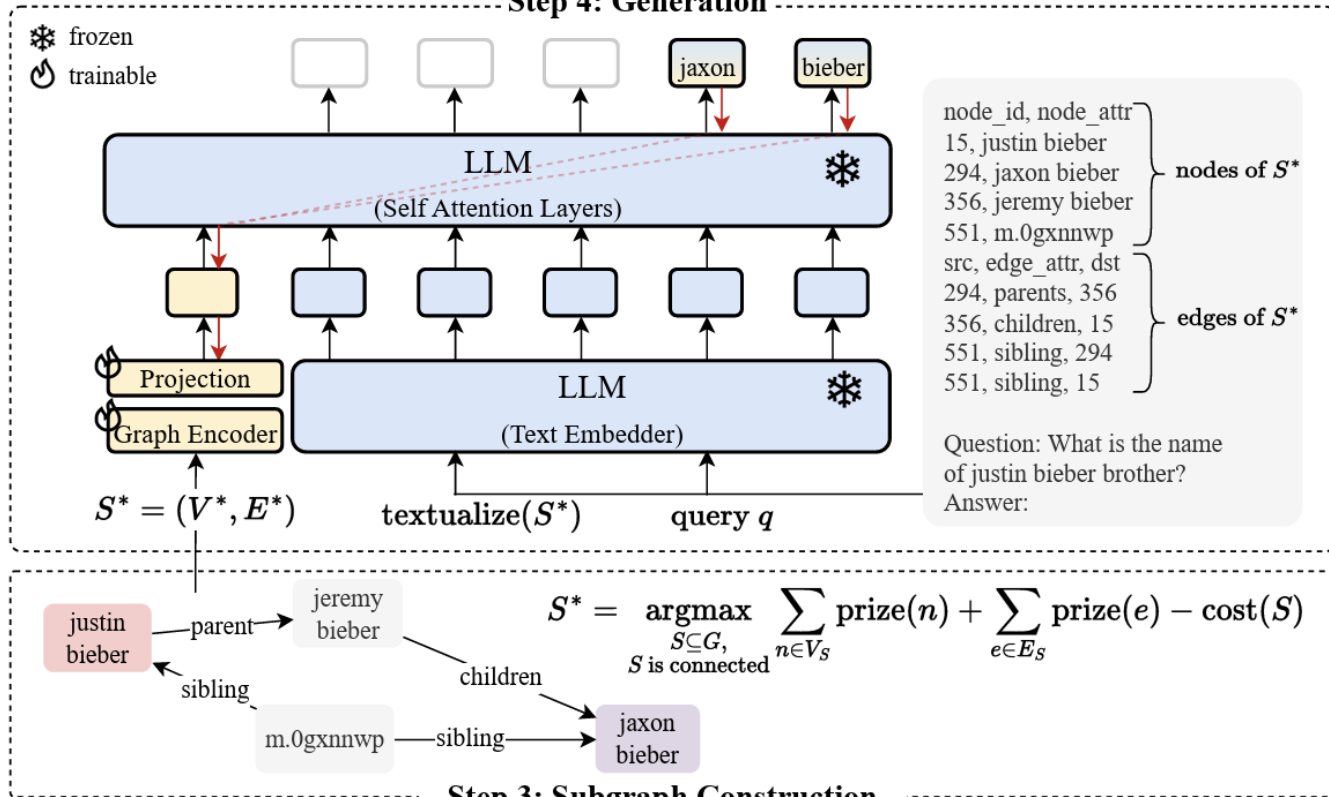

- integrates papers, patents, and clinical trials as core data
  - connections between papers, patents, and clinical trials through bioentities, projects, authors, and citations

# G-Retriever

## Step 1: Indexing

## Step 4: Generation

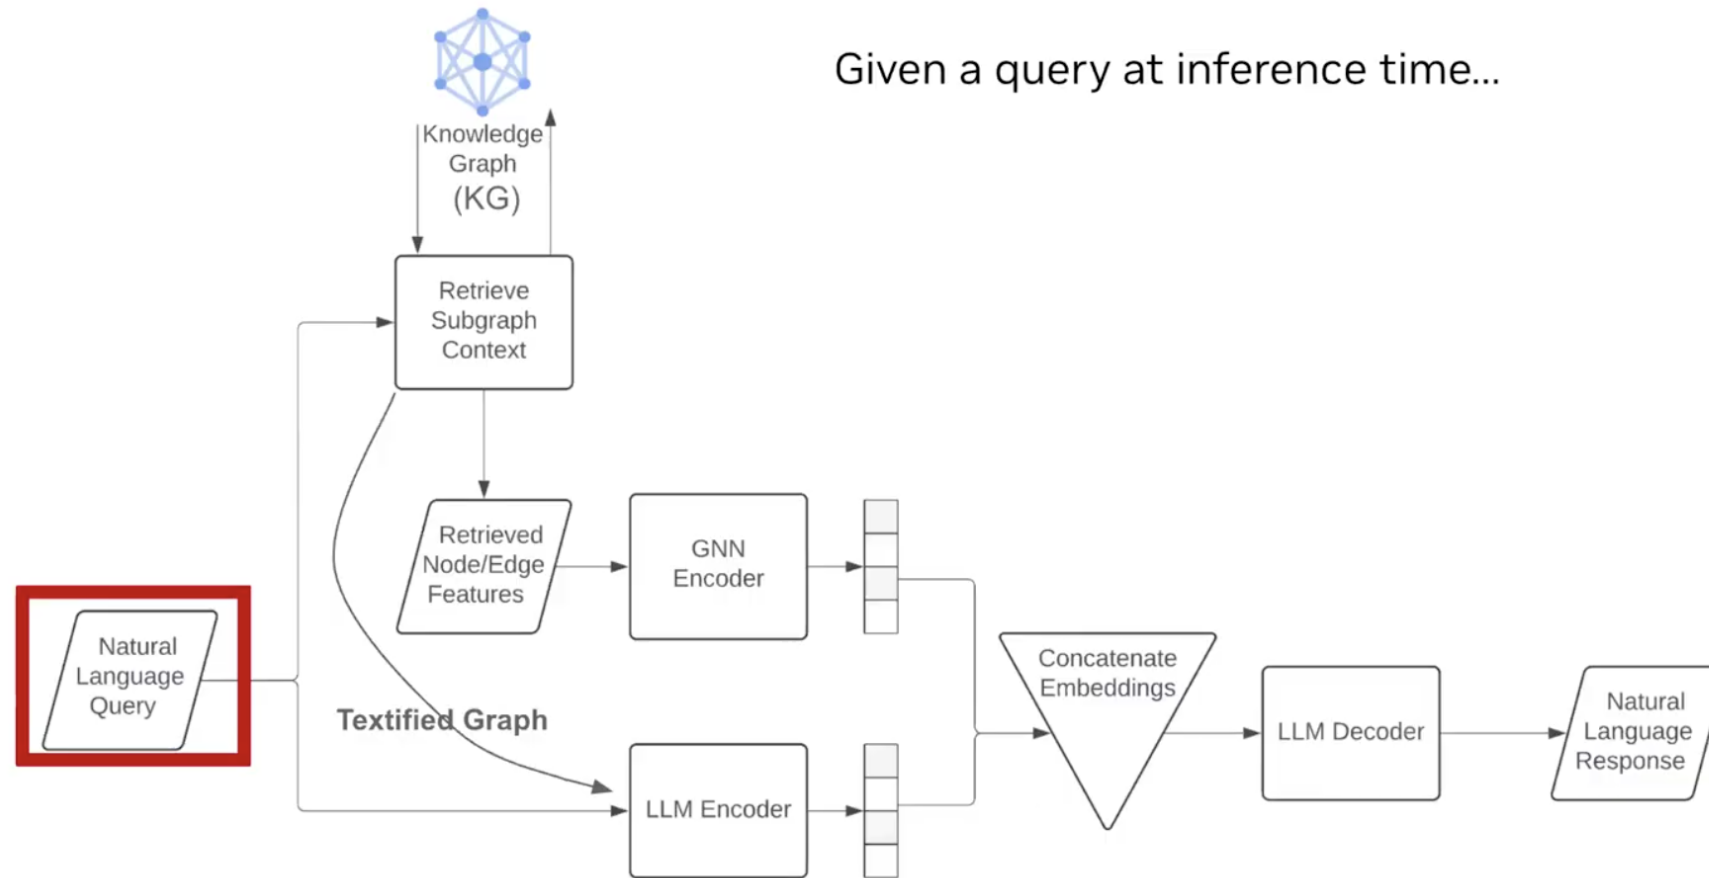

# GraphRAG (GNN + LLM)

## GNN+LLM Graph RAG (GNN Feeds LLM)

Given a query at inference time...

\*RAG = Retrieval Augmented Generation

\*G-retriever: <https://arxiv.org/abs/2402.07630>

# Workflow Overview
